

Compact Spring Rewind Reels

Designed for a variety of industrial applications

7000 Series is an extremely robust range of hose reels and is ideal for the most demanding of applications. The base and the guide arm are formed from high-grade pressed steel and the engineered structural forms within these parts give the 7000 Series its strength. The standard low pressure hose reel is for air or water service only. The medium and high pressure reels are for oil and grease respectively.

The 7000 Series is also available in stainless steel and for welding, fuel and twin hydraulic applications. See further in this catalogue.
